**National Standard - HEDIS®**

NS-H  Glaucoma screening

This HEDIS® measure includes members 67 years and older at the end of the report period.

A member is adherent to this measure if they have at least one eye exam by an optometrist or ophthalmologist during the last 24 months of the report period. A prior diagnosis of glaucoma or glaucoma suspect at any time during the member’s history is an optional HEDIS® exclusion criterion. In this EBM Connect measure, a result flag of NA (not applicable) is assigned if the eye exam intervention is missing and there is a claim for glaucoma or glaucoma suspect during the last 24 months of the report period.

This HEDIS® measure is based on the HEDIS® Glaucoma Screening in Older Adults specification document.
